Abdelrahman Hazem Khalil

EG: 01501557221 | abdulrhmanhimk@gmail.com

Arabic: Native speaker | English: Intermediate

Profile

Mechatronics Engineer with experience in machine vision, robotics, embedded systems, and ICT System. Experienced in developing computer vision inspection systems, ROS 2 robotic systems, and ESP32-based automation solutions, and preparing PDMs for ICT systems.

Education

Bachelor of Engineering (Hons.) in Mechatronics Engineering

Asia Pacific University of Technology & Innovation, Kuala Lumpur, Malaysia | Graduated Oct 2025

Master of Mechatronics Engineering

De Montfort University, UK

(Collaborative programme with Asia Pacific University) | 2021-2025

Experience

Project Engineer Intern

Control Easy Technology, Malaysia | Feb 2024 – Jun 2024

Draftsman

TERA, Remotely, Saudi Arabia | Dec 2025 – Jul 2026

Projects

- **AI Humanoid Robot** – ROS 2 robot with voice interaction, gesture detection, and navigation.
- **ECU Defect Detection System** – Machine vision inspection using OpenCV and Zebra VS40 camera.
- **Smart AGV for Chili Farm** – Vision-based disease detection and autonomous navigation.

Technical Skills

- **Programming:** Python, C#, MATLAB
- **Robotics & Embedded:** ROS 2, Arduino, ESP32, Gazebo, RViz, SLAM (Basic)
- **Computer Vision:** OpenCV, MediaPipe, Vision-Language Models (VLMs)
- **Tools & Software:** SolidWorks, Automation Studio, CX Programmer & Designer, AutoCAD
